

# IBM Data Analyst Capstone Project

João Victor Herculano Da Costa Teixeira

January 31, 2023

# OUTLINE

- Executive Summary
- Introduction
- Metholology
- Results
  - Visualization Charts
  - Dashboard
- Discussion
  - Findings & Implications
- Conclusion
- Appendix

# **EXECUTIVE SUMMARY**

- Current Technology Usage
- Future Technology Trends
  - Most Desired Languages for next year
  - Most Desired Databases for next year
  - Most Desired Web frames for next year
  - Most Desired Platforms for next year
- Demographic Data

# INTRODUCTION

- What are the most used programming languages?
- Which database is most commonly used?
- What are the best Web Frames to work with?
- Which platform is most commonly used?
- What are the trends for programming in the future?
- Who is the average programmer?

# **METHODOLOGY**

- Data Sources
  - 2019 Stack Overflow Developer Survey
- Data Exploration
- Data wrangling
- Data Visualization
- Sharing Results

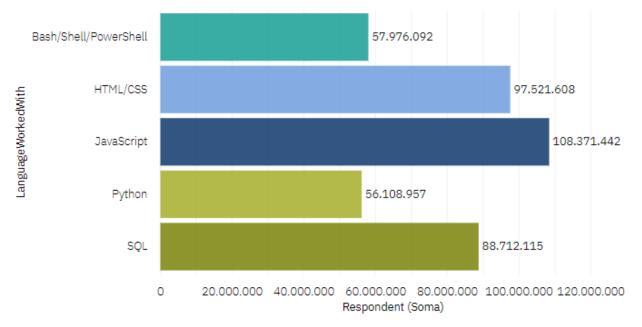

# RESULTS

Using the data that we have collected we are able to derive many important insights about the developers across the world such as salary in comparison with educational level, most commonly used tools, trends for the future and a plethora of important information about the developers themselves.

# PROGRAMMING LANGUAGE TRENDS

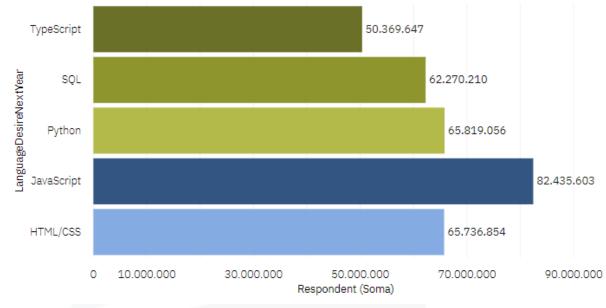

#### **Current Year**

Most Used Programming Languages

#### **Next Year**

Languages Most Desired for the NextYear

### PROGRAMMING LANGUAGE TRENDS - FINDINGS & **IMPLICATIONS**

### **Findings**

- JavaScript is the most popular Programing language and is expected to continue next year.
- Python is expected to increase in usage.
- Shell/PowerShell is expected to be replaced in the top 5 by TypeScript.

#### **Implications**

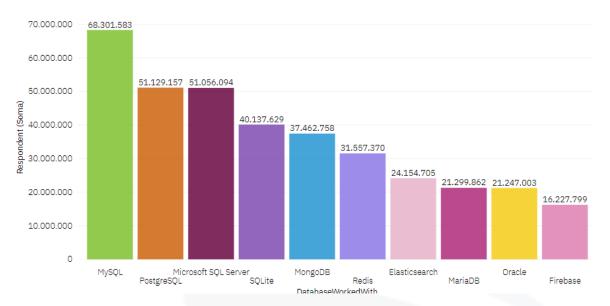

- Web development is and will still be in high demand.
- Due to the rise of Ai and Machine Learning python is becoming more popular.
- More and more developers are opting to learn TypeScript to complement their JavaScript.

### DATABASE TRENDS

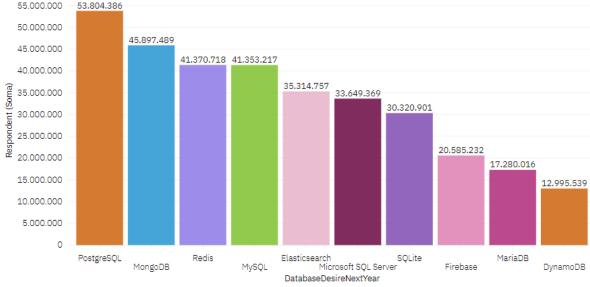

#### **Current Year**

#### **Next Year**

#### Databases Most Desired for the NextYear

# DATABASE TRENDS - FINDINGS & **IMPLICATIONS**

#### **Findings**

- MySQL is expected to no longer be the most popular Database.
- Even though Microsoft SQL Server is the third most used Database it is expected to lose popularity.
- Redis and Elasticsearch grow in popularity

#### **Implications**

- Open source Databases are widely used and are expected to continue to.
- Redis' growth in popularity is due to their support of abstract data types.
- MongoDB's usage increase is due to its speed and scalability, making it one of the most used in the future.

# **DASHBOARD**

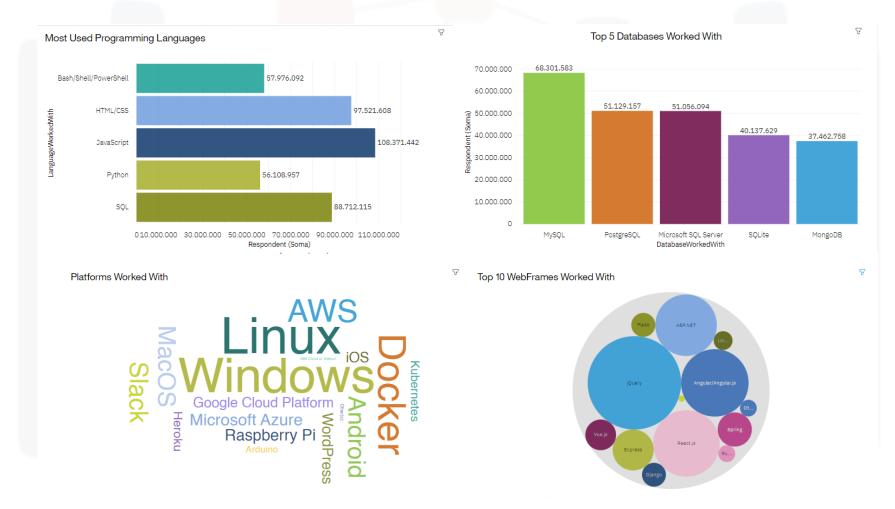

Link to Cognos Dashboard:

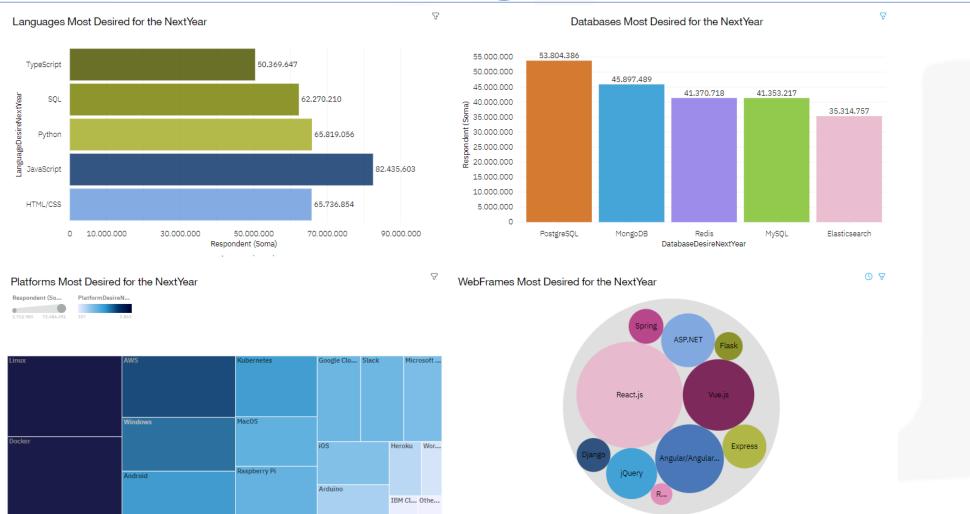

https://dataplatform.cloud.ibm.com/dashboards/c14ca37e-77a0-41ad-96ee-

c4bb9fc1a96a/view/5917ff6402ee23cc4dd5e2e4079824007 d347058babb8001d3827b4959627397f33d1591c87b185d88 100d35f6ec47519a

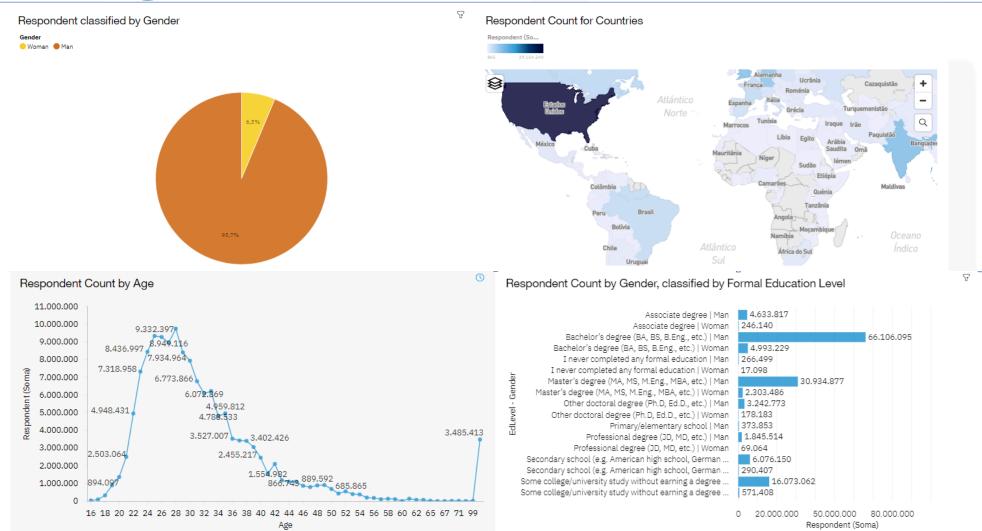

# Current Technology Usage

# Future Technology Trend

# Demographics

# **DISCUSSION**

- Trends in technology
- The profession's globalization
- Gender representation in the community
- The rise in popularity of python
- Age and education discrimination

# **OVERALL FINDINGS & IMPLICATIONS**

#### **Findings**

- JavaScript is the most popular Programing language and is expected to continue next year.
- Even though Microsoft SQL Server is the third most used Database it is expected to lose popularity.
- Python is expected to increase in usage.

#### **Implications**

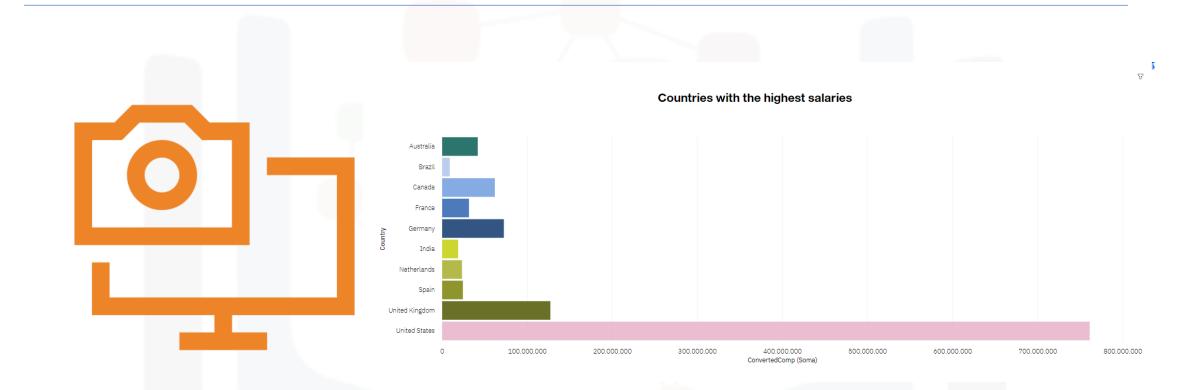

- Web development is and will still be in high demand.
- Open source Databases are widely used and are expected to continue to.
- Due to the rise of Ai and Machine Learning python is becoming more popular.

# CONCLUSION

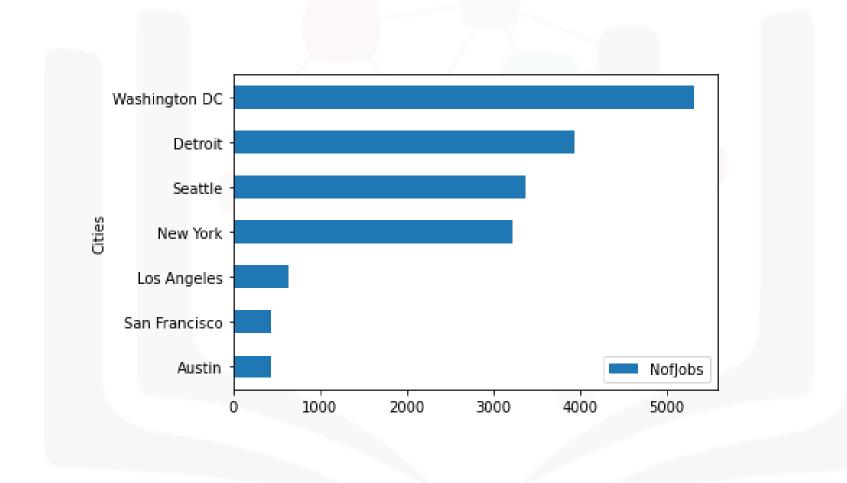

- The developer trend show that web development is and will be the area with the highest demand
- SQL is still going to be an essential skill to have.
- Developers are migrating towards opensource Databases.
- TypeScript saw an significant increase in popularity which implies demand.
